

South Florida **WATER** Drink to Your Health!

Dry Pellet Chlorinator

Step 3: Unscrew cap and fill approximately 1/3 to 1/2 full. **See Note below**

Step 2: Open faucet to drain chlorinator and release pressure.

Step 4: Close faucet

Step 1: Turn water off to chlorinator.

Step 5: Turn water back on.

Note: After filling the chlorinator with pellets, please check to be sure the threads on the cap are free from powder residue before screwing the cap back on.

Any questions regarding the system please call us.
